

This event, designed for physicians with an interest in gastroenterology (GI) and liver disease, will provide the most up-to-date information available on new advancements surrounding hepatitis, hepatocellular carcinoma, fatty liver disease and acute liver failure. You will have an opportunity to hear from experts and join case discussions. Continental breakfast and lunch will be served.

Course Objectives:

At the completion of the program, participants will be able to:

1. List the prevalence, risk factors, and treatment for fatty liver disease.
2. Discuss the epidemiology of acute liver injury in the United States.
3. Review success rates and complications of new triple therapy for hepatitis C genotype 1 patients.
4. Review complications of cirrhosis and indications for liver transplantation.
5. List complications of HBV and HCV in patients with HIV co-infection.
6. Review current therapies for hepatocellular carcinoma.
7. Describe screening tests and indications for treatment of hepatitis B

Agenda:

7:30 - 8:00 a.m.	Registration and Continental Breakfast
8:00 - 8:15	Opening Remarks <i>Stewart Cooper, M.D., Chief, Division of Hepatology, SPME, and Director of Hepatology Research</i>
8:15 - 9:00	Non-alcoholic Fatty Liver Disease: Weighing In on the Most Common Liver Disease <i>Raphael Merriman, M.D., Medical Director, Liver Transplantation</i>
9:00 - 9:45	Hepatotoxicity and Acute Liver Failure <i>Timothy Davern, M.D., Director, Acute Liver Failure Program</i>
9:45 - 10:30	A New Chapter in Chronic Hepatitis C <i>Adil "Ed" Wakil, M.D., Associate Chief, Division of Hepatology and Director of Operations</i>
10:30 - 10:45	Break
10:45 - 11:30	Management of the Complications of Cirrhosis <i>Raphael Merriman, M.D., Medical Director, Liver Transplantation</i>
